New features in the MacBook Storm[©]17”

- **Seamless Bootcamp 2.0:** The whole new seamless bootcamping technique allows a user to seamlessly integrate windows in a mac. While booting up both the operating systems start and windows has been integrated to discreet software which allows full functionality in disguise. So now all the windows software will run on a mac, better than windows. Gaming will be even better with the mac with upto 7 hours of battery backup in SB2.0 and yet full mobility as much power as a desktop.

- **Carbon Fiber Unibody** With the all-new Carbon Fiber Unibody design from apple you can be assured to get a high performance mac with a lightweight profile. And yet, your mac chassis is stronger than the diamond. The lightweight chassis ensure that your mac remains easy to carry and does not seem bulky due to its display.
